Subject: RE: Ludington RI/FS Work Plan

Mitch,

I have reviewed the Work Plan submitted for the Ludington WWTP by Fishbeck. I hereby approve it with the following modifications/clarifications.

- All boring shall be continuously sampled.
- EGLE staff shall be notified 5 days prior to the start of any field activities so that we may make arraignments for a site visit if deemed necessary.

Please be advised that if the proposed scope of work is not able to fully delineate the plume, additional work may be necessary. Feel free to contact me if you have any questions.

Eric Chattersson
